Automating Infrastructure Management

## Kelverion Integration Pack for Amazon EC2

### Automation for Cloud Provisioning

The Kelverion Integration Pack for Amazon EC2 is a compliant integration for the Microsoft System Center 2012 Orchestrator IT Process Automation Solution.

The Integration Pack enables pre-defined integration and automation capabilities associated with provisioning and managing Amazon EC2 instances, including a powerful 'Run EC2 Action' activity which runs all available EC2 actions.

The Integration Pack delivers a range of re-usable objects to automate IT-Functions such as:

**Automated Provisioning** - Automate the creation of resources in EC2 directly from Service Requests or automated resource scaling. Retire resources so stopping the billing and reclaim licenses for re-use.

**Management of EC2 Instances** – automate management of EC2 resources to support business demands and remove manual effort.

### Microsoft System Center 2012 Orchestrator

Orchestrator is part of Microsoft System Center 2012 suite, which provides solutions to manage both Microsoft and non-Microsoft Infrastructure covering event management, configuration management, data protection, virtual machine management, service management and IT Process Automation.

Find out more at [Microsoft System Center](http://www.microsoft.com/systemcenter/orchestrator)

### Kelverion

Kelverion offer Integration Packs and Tools to enhance Microsoft System Center 2012 Orchestrator, implementation services and a full suite of Orchestrator Training Courses.
