## Kelverion Training Services

### Azure Automation Training by the Automation Experts – Onsite and Online

Automation of IT Processes is a new subject to many IT Professionals and using ITPA tools is not just as easy as install them and then learn on the job. Each ITPA tool is fully customizable to support the business process you wish to implement so they largely start as a blank sheet of paper.

To help IT Professionals learn the tools Kelverion provide a range of training courses and we can offer bespoke training offering based around specific customer requirements.

Kelverion are also very aware that a training course is only as good as the skills and experience of the trainer in using the tool in the real world. This is why all our training courses are delivered by our Professional Services staff, who can not only tell you how the tool works but also bring real world examples into our training courses.

We offer both on-site and web based training courses, so you can tailor your training to your own business needs.

#### Azure Automation Onsite Training

The Kelverion Azure Automation Training Course provides an on-site 2 day training course on implementing Azure Automation and using the Kelverion Runbook Studio to build your own Runbooks.

This is an instructor led course with lab exercises.
