

Kelverion

Integration Pack for BMC Atrium

Automation for BMC Atrium

The Kelverion Integration Pack for BMC Atrium is a compliant integration for Microsoft System Center Orchestrator.

The Integration Packs supports BMC Atrium Core versions 9, 19, 20.01, 20.02 .

It enables users to exchange data with BMC Atrium Configuration Management Database at the configuration item (CI) and relationship level enabling sharing of CI data with other systems such as service desks and discovery tools.

The Integration Pack delivers a range of re-usable objects to automate IT-Functions such as:

Service Desk

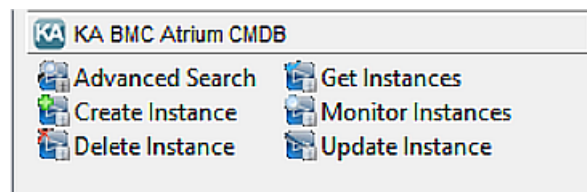

Query BMC Atrium for latest configuration details as part of a diagnostic/remediation process.

Configuration Management Systems

Transform and populate discovered data into CMDBs or Asset Systems. Maintain consistent updated CI information in disparate Service Desks and other tools.

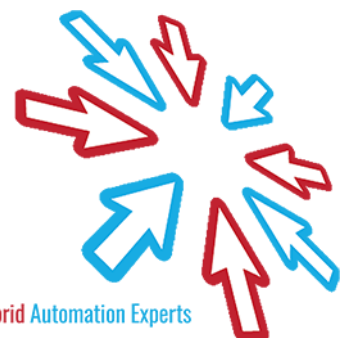

IP FOR BMC ATRIUM ACTIVITIES

Create Instance	Activity dynamically creates new Atrium Configuration Item record in standard or customised BMC Atrium systems
Get Instance	Returns specific instance
Update Instance	Updates specific instance
Delete Instance	Deletes specific instance
Monitor Instance	Monitors for creation or update of an instance
Advanced Search	Activity allows use of Atrium advanced search criteria
