# Kelverion

IP for Microsoft Entra ID

Automation for cloud only Active Directory

For customers running a hybrid on premise and cloud Active Directory solution then User account administration is done in the on premise Active Directory system and synchronized with Azure.

Customers who wish to run an Entra ID (formally Azure Active Directory) only solution must now do their Administration via the Azure web portal or Azure PowerShell.

The Kelverion Integration Pack for Microsoft Entra ID is a compliant integration for the Microsoft System Center Orchestrator IT Process Automation Solution.
The Integration Pack enables pre-defined integration and automation capabilities associated with provisioning and managing Users and licenses via Orchestrator.

The Integration Pack delivers a range of re-usable activities to automate IT functions such as:

Automated Provisioning Automate the creation of Entra ID Users directly from Service Requests and License those Users.

Management of Entra ID automate management of Users in Entra ID to support business demands and remove manual effort.

KA Microsoft Entra ID

|	
Add Group Member	Get Users
Add User	Remove Group Member
Add User License	Remove User
Get Group Members	Remove User License
