IP for Office 365

Automation for cloud only Office 365

For customers running a hybrid on premise Exchange and Office 365 solution then User account administration is done in the on premise Exchange system and synchronized with Office 365.
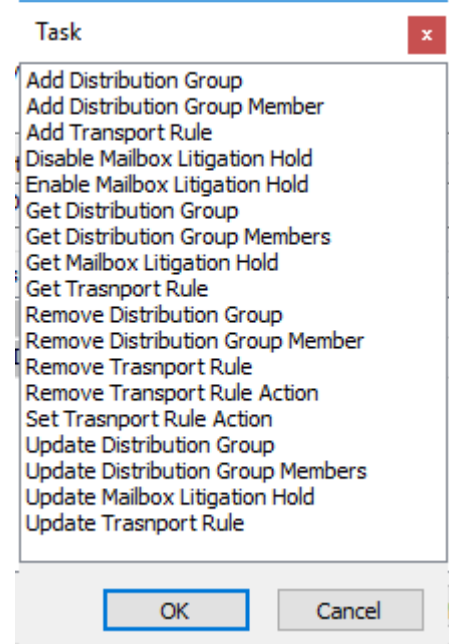

Customers who wish to run an Office 365 only solution must now do their Administration via the Office 365 web portal or PowerShell.

The Kelverion Integration Pack for Microsoft Office 365 is a compliant integration for the Microsoft System Center Orchestrator IT Process Automation Solution.

The Integration Pack enables pre-defined integration and automation capabilities associated with administrating Office 365 Exchange Online and SharePoint Online via Orchestrator.

The Integration Pack delivers a range of re-usable activities to automate IT functions such as:

Automated Provisioning automate the creation of New Email boxes or Skype for Business Accounts directly from Service Requests.

Management of Office 365 automate management of Exchange or Skype for Business Users to support business demands and remove manual effort.
