

IP for Microsoft Skype for Business

Orchestrator Integration for Skype for Business 2015 and Online

Skype for Business User Provision and Management is a detailed and time consuming process.

The Skype for Business Integration Pack from Kelverion simplifies the whole integration and automation challenge of Skype for Business from within Orchestrator by providing a set of robust forms driven Integration Pack Activities.

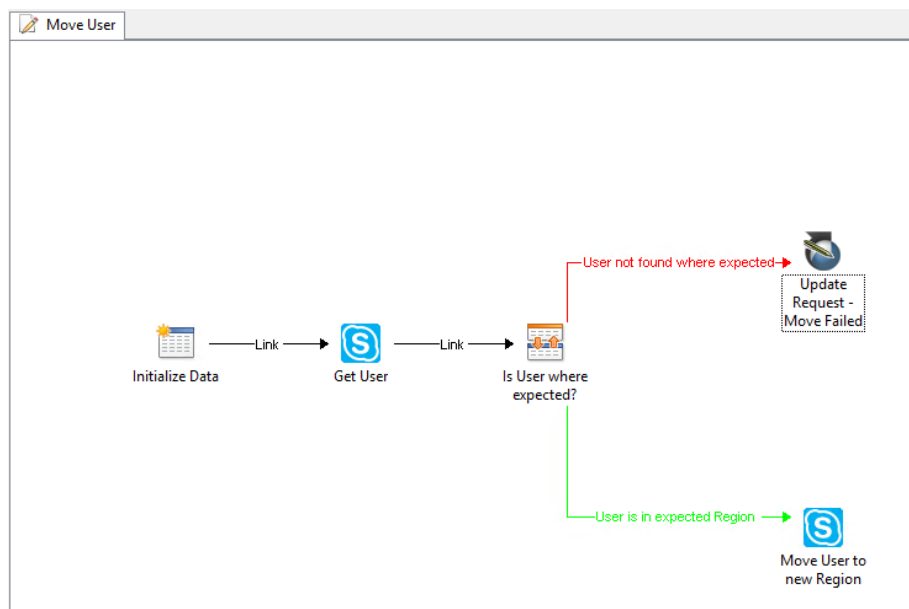

The Integration Pack for Skype for Business

is a compliant integration for the Microsoft System Center 2012 Orchestrator IT Process Automation Solution and supports Skype for Business 2015 and Skype for Business Online environments.

The Integration Pack delivers activities to automate IT-Functions such as:

Automated Provisioning - Automate the creation of Skype for Business Users directly from Service Requests.

Automated Moves and Changes -

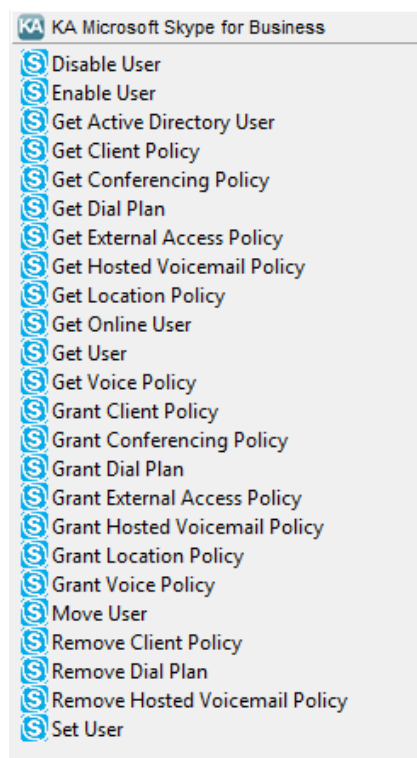

Automate the moving of Users between different Skype for Business instances in different Regions or add and remove Skype for Business functions from an existing Users.
