Integration Pack for Microsoft System Center

More Automation for System Center 2016 and 2019

The Integration Pack for Microsoft System Center is compliant with Microsoft System Center Orchestrator.

Microsoft provides Orchestrator Integration Packs for their System Center 2016 & 2019 toolset, however, these Integration Packs lack certain capabilities that many Orchestrator users desperately need to automate their System Center deployments.

Therefore Kelverion have released this Integration Pack which adds tasks to the existing Microsoft System Center Integration Pack capabilities.

This release covers the following products:

- Configuration Manager 2016 & 2019
- Operations Manager 2016 & 2019

The Integration Pack contains an Activity for SCCM and SCOM. Each Activity offers several product specific, selectable tasks. Each task has its own set of parameters and filters.

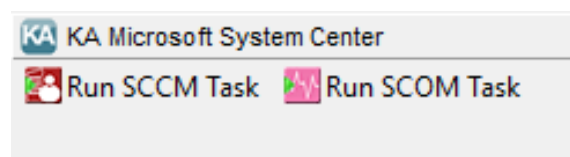

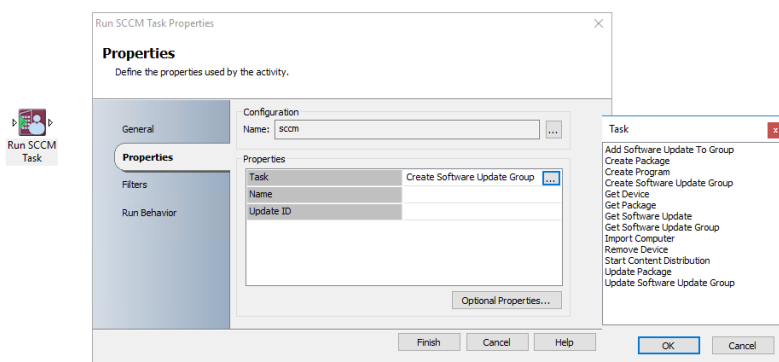

IP FOR SYSTEM CENTER ACTIVITIES

SCCM

Add Software Update To Group
Create Package
Create Program
Create Software Update Group
Get Device
Get Package
Get Site System Server
Get Software Update
Get Software Update Group
Import Computer
Remove Device
Start Content Distribution
