

Kelverion

Integration Pack for Cisco Prime

Automation for Cisco Prime

The Kelverion Integration Pack for Cisco Prime is a compliant integration for Microsoft System Center 2012 R2 Orchestrator or System Center 2016 Orchestrator.

The Integration Pack supports Cisco Prime versions 2.2, 3.1 and 3.2.

It provides pre-defined integration and automation capabilities associated with Alarm and management functionality in Cisco Prime.

The Integration Pack delivers a range of re-usable objects to automate IT-Functions such as:

Automated Diagnostic

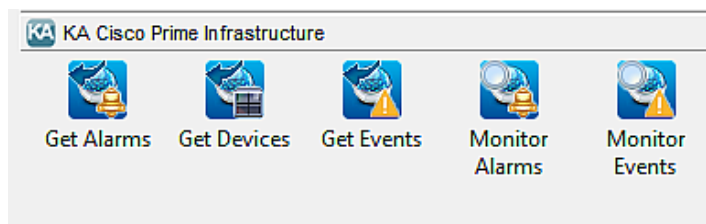

Automate the monitoring of the event management system for new events and then conduct first level diagnostics

Manager of Managers

Consolidate disparate event management streams into a single event management tool to provide a single pane of glass view.

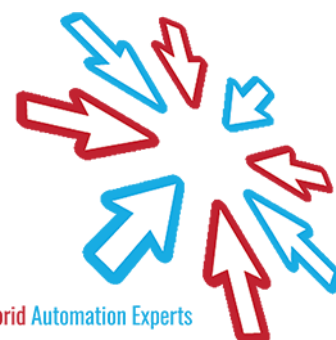

IP FOR CISCO PRIME ACTIVITIES

Get Alarms	Retrieve and filter Prime Infrastructure alarms
Get Devices	Retrieve and filter Prime Infrastructure devices
Get Events	Retrieve and filter Prime Infrastructure events
Monitor Alarms	Enable a Runbook to detect new and/or updated Prime Infrastructure alarms
Monitor Events	Detect new Prime Infrastructure events

Kelverion are a Microsoft System Center and Cloud Partner who offer Integration Packs and Tools to enhance System Center Orchestrator and Azure Automation and deliver System Center implementation services.
