Kelverion

Integration Pack for Nagios XI
Automation for Nagios

The Kelverion Integration Pack for Nagios XI is a compliant integration for Microsoft System Center 2012 R2 Orchestrator or System Center 2016 Orchestrator.

Nagios now provides two integration APIs a legacy SOAP and a new REST API. We have two versions of the Nagios Integration Pack available; a legacy version and a REST API variant.

The choice of which Integration Pack to choose depends on your versions of Nagios XI:

| Nagios XI version	Integration Pack Version
New customer using a version of Nagios XI less then 5.4.3	IP Version 1.2
Existing customer using a version of Nagios XI less then 5.4.3	IP Version 1.2 Existing customers should not upgrade to version 1.3
5.4.3, 5.4.6 or higher	IP Version 1.3

The Integration Pack supports the XI variant of Nagios. The supported versions of XI are ;
IP version 1.2 — xi-2014r1.4 to xi-5.4.2
IP version 1.3 — xi-5.4.3 and xi-5.4.6

The Integration Pack delivers a range of re-usable Activities to automate IT Functions such as:

Automated Diagnostic - Automate the monitoring of the event management system for new events and then conduct first level diagnostics
